Technology

Microsoft .NET Framework

The Rescop compliance software has been built on the Microsoft .NET Framework 3.5. This Framework is a development and execution environment that allows different programming languages & libraries to work together seamlessly to create Windows, Web, or Mobile applications that are easier to build, manage, deploy, and integrate with other networked systems or as stand alone applications. ASP.NET is part of the .NET Framework and provides the technology for creating dynamic Web applications. Thanks to the Microsoft .NET Framework the Rescop compliance software offers a unique architecture that offers unlimited flexibility to meet your company's unique needs.

Client software

Web browser

Microsoft Internet Explorer 6.0 SP3 or later. Recommended IE 7.0. See Appendix A for requirement details.

Crystal Reports is used for generation of .-pdf documents. In case the client wants to be able to manage the layout of documents by themselves, Crystal Reports Developer is required.

Application server

Web server

- A web server with .NET 3.5 installed. We recommend using Internet Information Services (IIS) version 6 or later, which is available on Windows 2003/2008 platforms. See Appendix B for requirement details.
- Crystal Report Runtime Framework ver. XI

Database server

Database platform

- Microsoft SQL Server 2005/2008 Standard/Enterprise edition (See Appendix C for requirement details)
- Oracle 10g/11g Standard/Enterprise edition (See Appendix D for requirement details)

Appendix B: Windows Server System Requirements

Windows Server 2003/2008 Standard/Enterprise edition - System Requirements

Visit the Microsoft Windows Server website at <http://www.microsoft.com/servers> for the most recent system requirements information.

Requirements:

- Processor 1-GHz or faster
- Platform 32/64 bit
- RAM 1 GB or more
- Hard Disk 2 GB
- Devices: CD-ROM or DVD-ROM drive

Appendix C: Microsoft SQL Server 2005/2008 System Requirements

Microsoft SQL Server 2005/2008 Standard/Enterprise edition - System Requirements

Visit the Microsoft SQL Server website at <http://www.microsoft.com/sql> for the most recent system requirements information.

Requirements:

- Operating system Windows Server 2003/2008 or SBS 2003/2008
- Platform 32/64 bit
- Processor 1-GHz or faster
- RAM 1 GB or more
- Hard Disk 10 GB or more

Appendix D: Oracle 10g/11g System Requirements

Oracle 10/11g Standard/Enterprise Edition - System Requirements

Visit website at <http://www.oracle.com/technology/software/products/database/index.html> for the most recent system requirements information.

Requirements:

- Operating system Windows Server (SBS) 200x, Linux x86-64, Solaris, HP-UX Itanium, AIX
- Platforms 32/64 bit
- Processor 1-GHz or faster
- RAM 1 GB or more
- Hard Disk 10 GB or more
